# PARIS 5% BONDS An Investment With Fortune-Making Possibilities

(LOAN OF 1919)

We advise the immediate purchase of these securities which may now be bought at a fraction of their normal exchange value.

Paris bonds are selling around 70% of their par value. A 500-france bond costs about 350 france. Twenty 500 france bonds or a unit of 10,000 france therefore costs. 7,000 france.

From 5 ceets per frame to 10 cents per frame will be a natural step. The value of 10,000 frames will then be sworth \$1,000.00 frames will then be be worth \$1,000.00. Today the same number of bond may be bought for \$250.00. Every investment made today will show a net profit of \$720.00 when the frame is at 10 cents.

At 15 cents per frame the value of a 500-frame bond quoted at par will be \$75.00. Twenty 500-bonds will be worth \$1,000.00. Today twenty frame bonds can be bought for \$220.00, and this investor will therefore show a net profit of \$1,300.00 when frame is worth 15 cents.

That the French franc will seture to its old gold value of 19.5 cents or \$1.30.00 per 10.000 france is the content on of many of France so much prominent atleasance and financers. An expensive has said "The franc will improve alongly but surely like the wine of our country."

Since the Armistice the following recoveries in the value of various exchanges have taken place: The value of 10,000 Spanish posetas has increased by \$400.00.

The value of 10,000 Danish krone has increased by \$1,300.00.

The value of 10,000 Norwegian krone has increased by \$1,405.00.

Even Canadian dollars enflered a fairly severe depre-ciation after the war. If, for the purpose of illustration,

The natural result of these measures has been, and will continue to be, a rising rate of exchange for the
